

## Metaform Fixings Systems

**M**etalscreeds range of fixings have been designed to suit a wide variety of applications, whether you want to fix on one side, or both, require adjustment or not, want to fit to falls or just need a speedy installation, there is a fixing that will suit.

### Angled Metal Foot.

Fixes to Metaform with screws & wingnuts, height adjustable, provides a strong stable mounting, useful for fixing directly to metal decking or a concrete sub-base, can also be anchored with timber props, concrete dabs or roadform pins.

- All feet fixings are designed to be sturdy and rigid.
- The right fixing for the right purpose.
- All feet can mount either or both sides of joint.
- Either adjustable with wingnut and bolt or snap in fit.

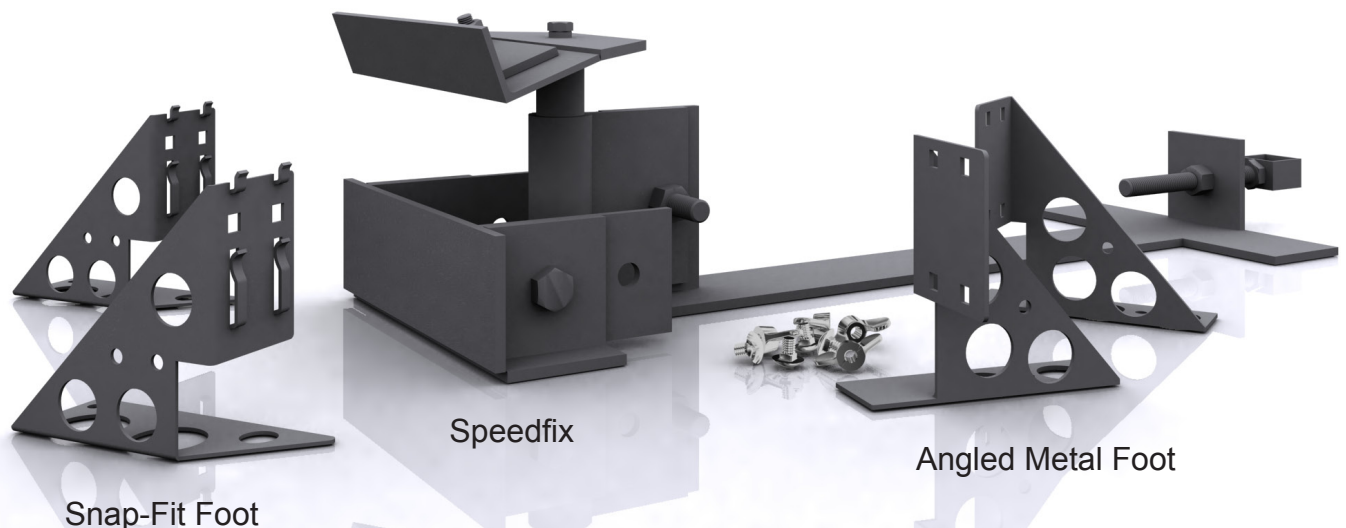

### Snap-fit Metal Foot.

Quick fitting and ideal for most applications, particularly suitable for larger jobs where a lot of feet are required, can be anchored with timber props, concrete dabs or roadform pins.

### Speedfix.

The ultimate for fast track installation, adjustment and removal. Speedfix provides full height, tilt, and lateral adjustment when clamped to the Metaform joint detail. Speedfix's patent and design protected operation allows power trowelling up to and over the joint edge, micrometer adjustments can also be made during and immediately after the pour.

- Feet provide additional anchoring into slab for the joint.
- Speedfix can be used over and over again.
- Even with Speedfix, Striker Tube or Screeder passes right over the foot.
